

PUMP-FLO™ Connect

PUMP-FLO™ Connect Version 1.7 Now Available!

Connect is designed to assist manufacturers in the pump selection process. Connect provides a place for companies to list their digitized catalogs of performance curves in a convenient, affordable and securely hosted cloud environment. The service gives manufacturers' customers access to their unique storefront and allows users to size and select centrifugal pumps based on design-specific system requirements.

PUMP-FLO™ CONNECT FEATURES

Web-based pump selection software utilizing Amazon cloud hosting

Pump sizing, selection and evaluation

Dynamically generate pump curves and data sheet

Search by pump catalog, type, speed and operation

VFD analysis

Extensive fluid table and support for custom fluids

Custom website integration and branding

Additional Features

- Operating point reporting based on intersection of system resistance curve and selected performance curve
- All-new optional reporting of speed at design flow
- Enhanced customization of manufacturer branding for PUMP-FLO™ Connect storefronts
- Two ways to dynamically change speed and impeller diameters on performance curves
- Multiple speed curves with design point, efficiency, NPSHr, power, and SRC's
- Enhanced manual selection functionality
- An updated and sustainable code base
- Improvements to site monitoring
- Enhanced mobile presentation
